SUMMARY

Fourth-year Information Technology student at Tunis Business School, combining IT infrastructure administration and maintenance, software development, and business analytics. Experienced in IT support and troubleshooting, backend API development, web and mobile applications, semantic search systems, and data analysis. Interested in backend engineering, artificial intelligence, and data engineering, with a focus on developing practical solutions to real-world problems.

EDUCATION

Tunis Business School (TBS) 2023 – 2027

Bachelor of Science in Business Administration *In Progress*

Major: **Information Technology** | Minor: **Business Analytics**

EXPERIENCE

Software Development Intern | 3LM Solutions Jun 2026 – Aug 2026

- Prepared a Software Requirements Specification (SRS) for an application.
- Developed a React Native mobile application as part of an ERP system.

Software Development Intern | SRT Bizerte Jul 2026 – Aug 2026

- Developed a platform to reduce manual data entry in the HR department and digitize insurance-related workflows.
- Organized digital records and supported day-to-day data management operations.

Freelance Software Developer | Academic Client Project feb 2026 – jun 2026

- Designed and developed a bus management system for an end-of-study project, covering bus, station, and bus–station interaction management.
- Implemented backend logic and data management to support transport operations.

Software Developer | Ben Miled Store Jun 2025 – Aug 2025

- Designed, developed, and maintained a platform to manage sales and monitor inventory.

Sales Assistant | Ben Miled Store Jun 2024 – Aug 2024

- Assisted customers, processed sales transactions, organized products, and monitored stock levels.

PROJECTS

TBS Chatbot – Retrieval-Augmented Generation (RAG) *Python, Flask, FAISS, PostgreSQL*

- Developed a university information chatbot using semantic search and retrieval-augmented generation to provide context-aware answers from structured knowledge sources.

CarthageConnect – Influencer Analytics Platform *Python, Flask, React, PostgreSQL*

- Built a REST API-driven platform with a custom Trust Score Engine to assess influencer engagement authenticity.

SmartHome Management System *java, javaFX*

- Developed a JavaFX smart home application using OOP principles to simulate sensors and manage connected IoT devices.

TBS Course Management API *Python, Flask, Docker, Swagger*

- Designed and documented a REST API for retrieving and managing university program and course information.

Amazon Sales Analytics *Python, Pandas, Power BI*

- Analyzed e-commerce sales performance and product profitability through data cleaning, analysis, and visualization.

Tunisian Stock Market Analysis *R, FactoMineR, PCA, Regression*

- Applied multivariate statistical analysis and regression to examine listed companies, trading volume, and price movements.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, R, Java

Backend and APIs: Flask, REST APIs, Swagger, JSON

Frontend: React, React Native, JavaFX

Databases: MySQL, PostgreSQL

Data and AI: Pandas, Power BI, Data Cleaning, Exploratory Data Analysis, PCA, Regression, RAG, Semantic Search

Tools: Git, GitHub, Docker

Core Competencies: Problem Solving, Analytical Thinking, Teamwork, Communication

LANGUAGES AND ACTIVITIES

Languages: Arabic (Native), English (Fluent), French (Fluent), Spanish (Beginner)

Community: Google Developer Groups Bizerte – participated in technical workshops, hackathons, and event organization.
